**Statement from Marcus Hill, President of the Senior Executives Association, on the Congressional Consideration of the Protect America's Workers Act**

The Protect America's Workers Act reflects a core principle SEA has long supported: that a federal workforce with strong rights, including collective bargaining rights, is fundamental to effective government. When employees have a voice in their workplace and confidence in the fairness of their working conditions, both morale and performance improve.

SEA supports the broader goal of strengthening the rights and workplace conditions that help federal employees engage productively with their agencies and deliver the high-quality performance the public deserves.

SEA will continue to champion policies that foster a professional, empowered, and mission-driven federal workforce.

**About the Senior Executives Association**

The Senior Executives Association (SEA) is a professional association representing Senior Executive Service members and other career federal executives. Founded in 1980, SEA's goals are to improve the efficiency, effectiveness, and productivity of the federal government; to advance the professionalism and advocate the interests of career federal executives; and to enhance public recognition of their contributions.
